PROFESSIONAL MISTING SYSTEMS FOR HOTEL & RESORT

M42 is the perfect misting system for outdoor areas of restaurants, resorts, hotels, retail and theme parks, stables and farms. When air temperature rises, M42 creates an oasis for people, plants, animals or goods. Outdoor spaces become accessible, fresh and pleasant. Customer satisfaction, the comfort of people, the well-being of animals and return on investment are guaranteed.

M42 the natural solution to lower outdoor temperature more than 10°C.

In hotels and resorts everything from the check-in to check-out experience is meticulously analysed and managed by hoteliers. If your focus on guest comfort is to offer an unforgettable experience, outdoor lounging and pool side areas make the difference in a highly competitive market where the guests look for luxury and relax.

Installing M42 and lowering temperature of more of than 10° C in terraces, lounging, relax and pools areas means offer to guests lovely habitats.

Unused areas impact negatively on aesthetics and are also a waste of space that could instead increase your business.

If you made huge investments for furnishing outdoor areas or if on the contrary you did not invest in these areas thinking that they would remain empty for most of the year M42 systems are the perfect solution to review your strategy.

Natural Misting produces and provide outdoor misting systems for businesses, designed for an intensive use.

Technical innovation, aesthetic, environment friendliness and consumption reduction are the hallmarks that differentiate and distinguish our systems.
