PROFESSIONAL MISTING SYSTEMS FOR RESTAURANT BARS & CLUBS

M42 is the perfect misting system for outdoor areas of restaurants, resorts, hotels, retail and theme parks, stables and farms. When air temperature rises, M42 creates an oasis for people, plants, animals or goods. Outdoor spaces become accessible, fresh and pleasant. Customer satisfaction, the comfort of people, the well-being of animals and return on investment are guaranteed.

Natural Misting produces and provide outdoor misting systems for businesses, designed for an intensive use.

Technical innovation, aesthetic, environment friendliness and consumption reduction are the hallmarks that differentiate and distinguish our systems.

M42 the natural solution to lower outdoor temperature more than 10°C.

When tables are full, restaurants thrive. Installing an M42 system in outdoor areas previously unused during summer because of hot temperature, is the solution to make them fresh and convivial environments. Extending dining areas with an M42 allows restaurants and other food services to maintain a steady revenue base that is less seasonal in nature. Thanks to the greater number of seats, rotation of tables and service hours are optimized.

The art of dining is the result of a mixture of elements that tell customers about attention that you reserve them. Details, service and first of all comfort are decisive for success. With M42 terraces and outdoor areas turn into valuable environments for your business: they are fresh and relaxing, the perfect place to eat, drink and stay with friends.

M42 systems are a viable solution to lower outdoor temperature and equip gazebos, outdoor kitchens, show cooking events, to transform waiting and smoking areas into pleasant spaces thus providing an added value for customers. Misting adds a visual effect that attracts the attention of customers and passers-by.

KEEP AWAY
FLYING INSECTS

Easy to use M42 systems are installed quickly: all you need is a power point and a water arrival.
